

teslams '26 ampere arena

Electrical and electronics fundamentals, followed by a circuit correction challenge, It emphasizes hands-on skills, requiring participants to assemble and connect components on a breadboard based on a given circuit. The event encourages teamwork, problem-solving, and application of theoretical knowledge in real-world scenarios.

12TH SEPTEMBER 2026

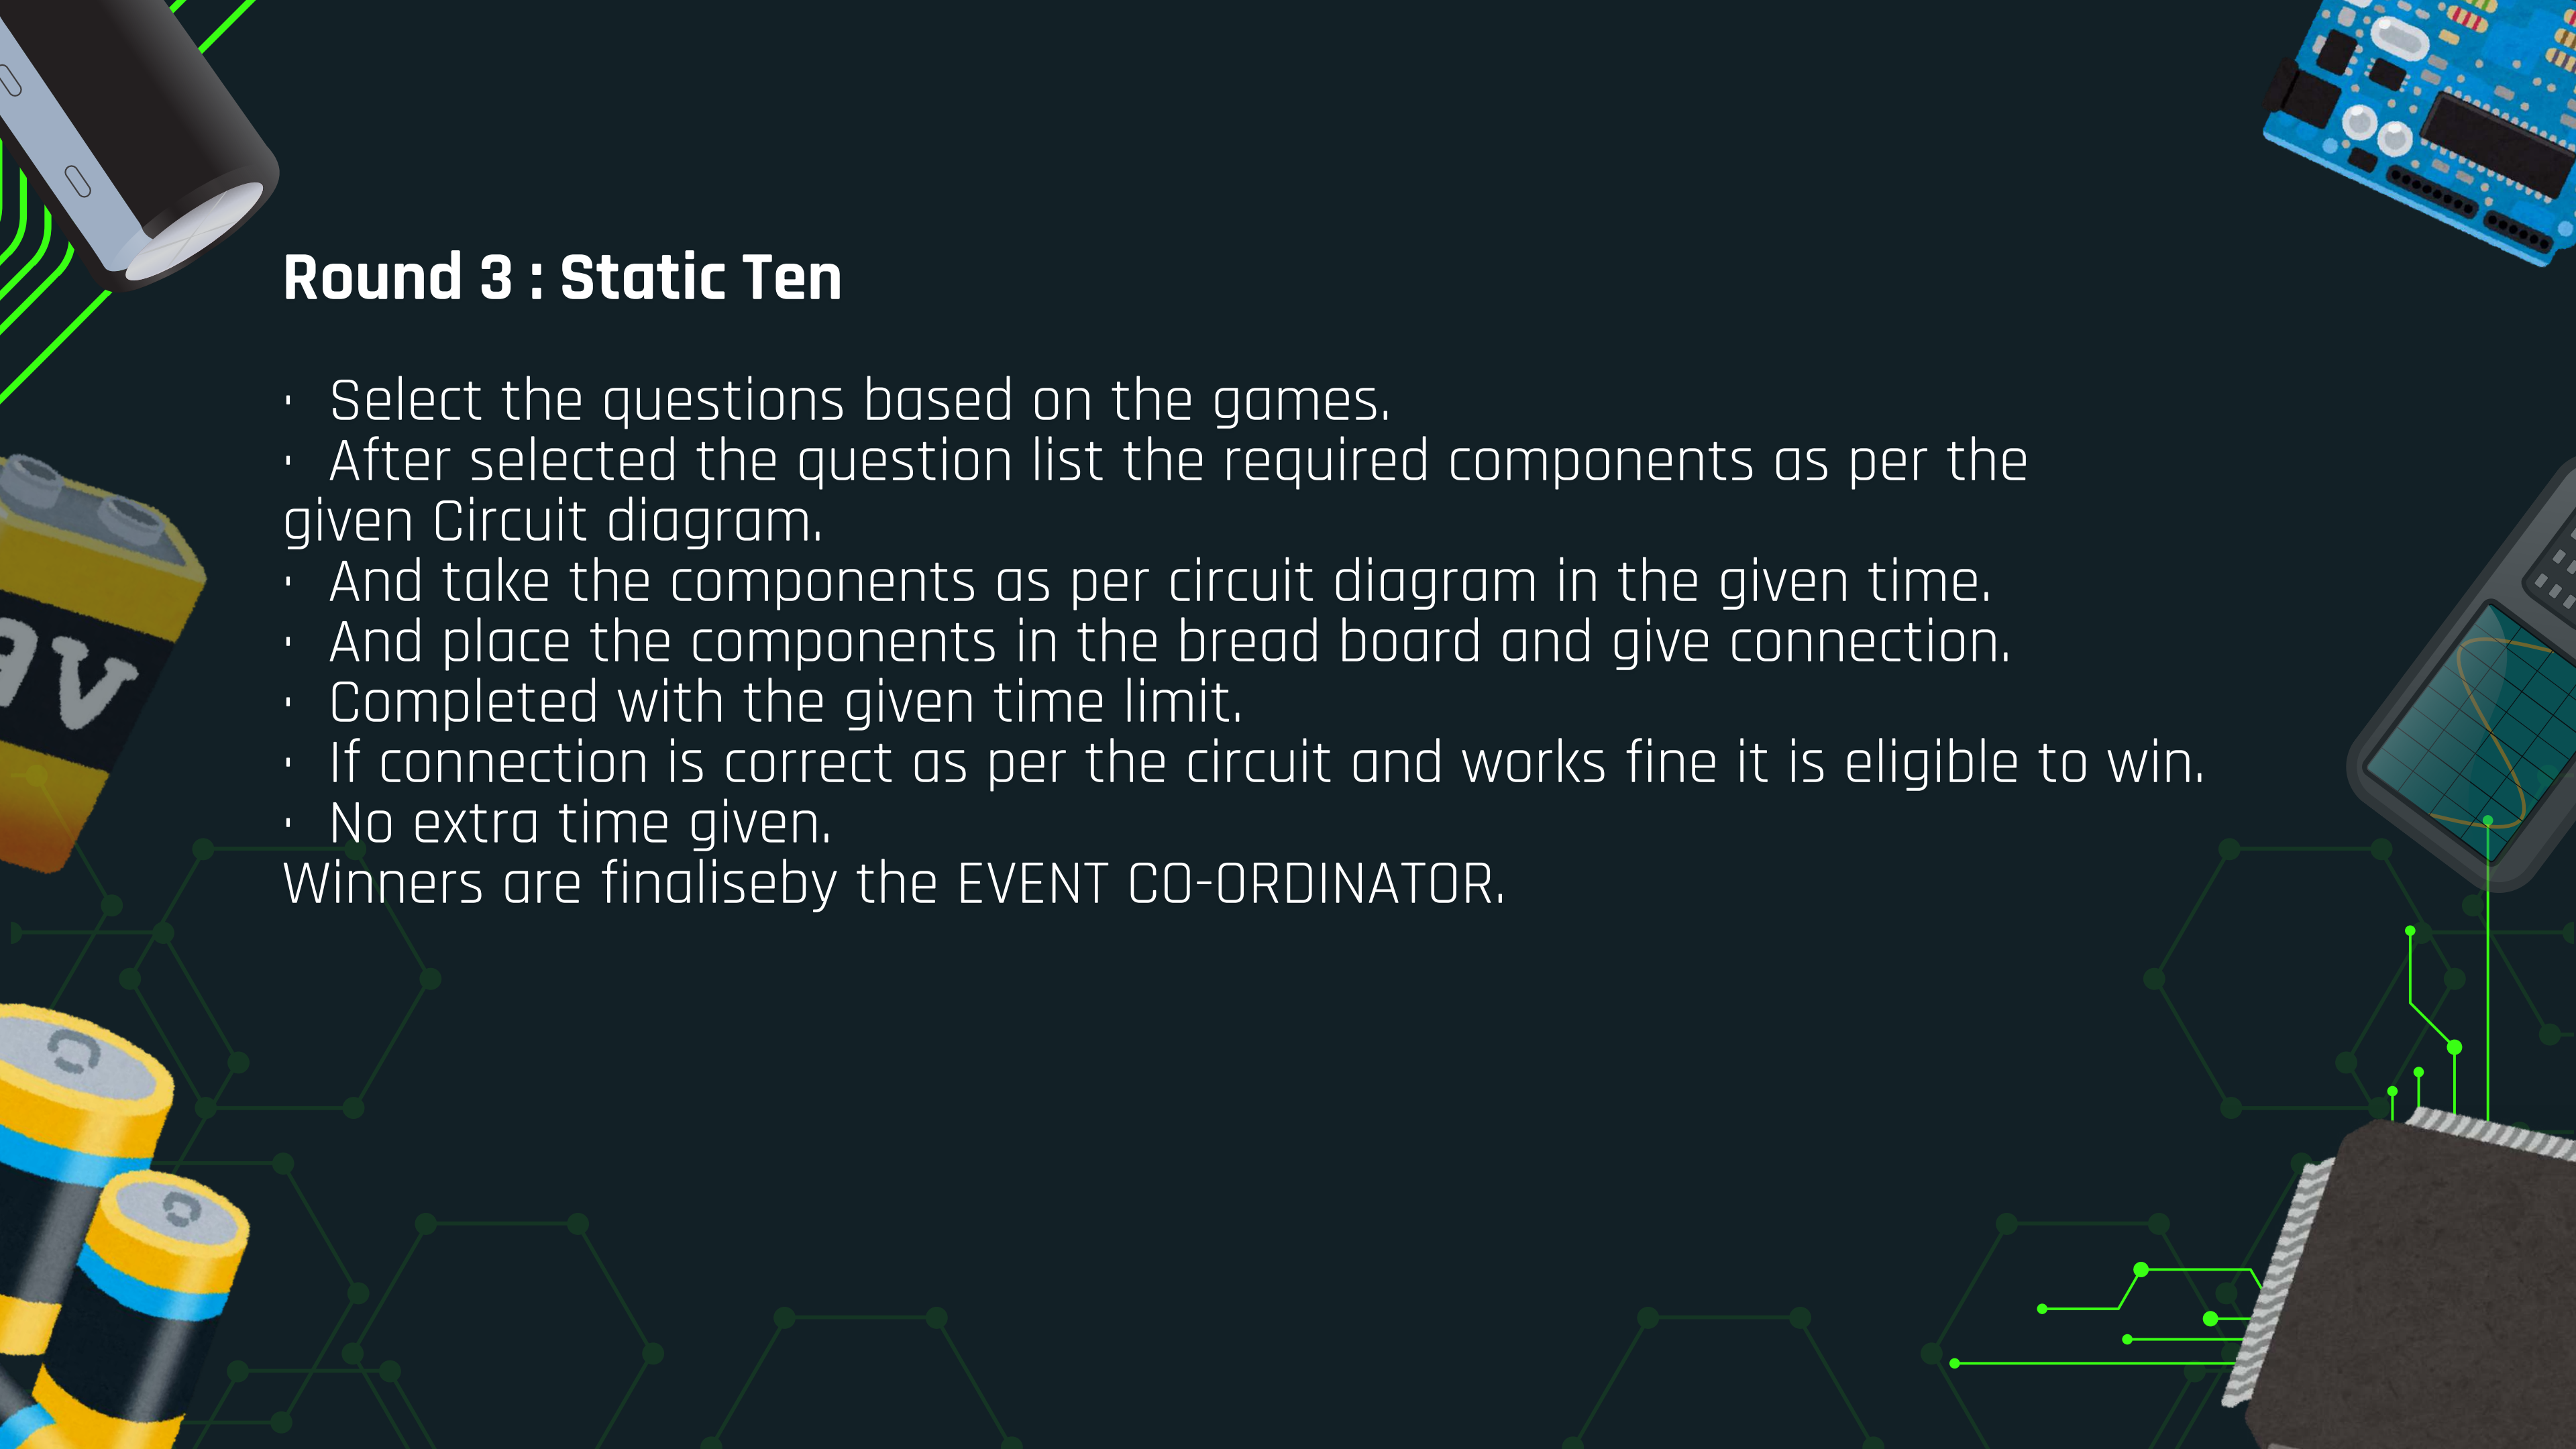

Round 1: Rapid Hz

Technical quiz related to fundamental electrical & electronics

- Total 20 Questions it based on time.
- Each questionshave 30 Sec with Choice
- Question will Dictate Twice.
- Each questioncarries 1 point
- TOTAL 20 POINTS

Round 2 : Electro Solve

- Find the 3 mistake in the given circuit and Draw the correct circuit diagram in the answer sheet.
- Each correctioncarries 10 POINTS.
- Time Limit : 5 Minutes.
- TOTAL 30 POINTS

The background is a dark blue gradient with various electronic-themed illustrations. In the top left, there's a black cylindrical component with green lines extending from it. In the top right, a blue circuit board with various components is shown. On the right side, a smartphone displays a green sine wave on its screen. At the bottom left, there are yellow and black cylindrical components. The bottom of the image features a network of green hexagons connected by lines, with some green lines extending upwards from the bottom right.

Round 3 : Static Ten

- Select the questions based on the games.
- After selected the question list the required components as per the given Circuit diagram.
- And take the components as per circuit diagram in the given time.
- And place the components in the bread board and give connection.
- Completed with the given time limit.
- If connection is correct as per the circuit and works fine it is eligible to win.
- No extra time given.

Winners are finalise by the EVENT CO-ORDINATOR.

Venue:

Power Electronics Lab , EEE Department.

ORGANIZERS:

NATHIM
ANAS
NAVEEN
